

Colocation Rack Space

The Redblade Colo option

The Redblade Colocation Service allows you to protect your business information by installing your own equipment in a secure, robust environment. This ensures that your equipment has optimum internet connectivity, resilience and physical security. Our onsite data centre facility ensures that your business stays connected and the integrity of your servers is never compromised.

The advantages of the Redblade Colocation Service are:

- ◆ Business-critical service levels of your servers are maintained.
- ◆ Bespoke options can be built around your particular requirements.
- ◆ By hosting fault tolerant, hot standby systems within our facility you can ensure a swift recovery from system outages.
- ◆ It is fully scalable allowing you to rest assured that you have a long term solution that will grow with your business requirements.
- ◆ Takes advantage of the system you currently have and enhances it by integrating easily with your business processes.

The Colocation Centre has the following features:

- ◆ Power redundancy with backup generators to the building.
- ◆ Air conditioning system.
- ◆ Fire suppressant system.
- ◆ Redundant internet feeds to the rack.
- ◆ Multihomed IP Transit. Internet bandwidth can be routed through multiple sites in case of failure.
- ◆ Secure physical access to the colocation centre.

Additional options that can be provided with the Redblade Colocation service are:

- ◆ Remote IP KVM support.
- ◆ A Port on an APC Power Switch for remote reboots.
- ◆ Additional bandwidth in 1 Mbps increments.
- ◆ A Managed Firewall including remote VPN client access and a site to site VPN to the client's network.
