

Redblade Ltd

As an IT Technical Services Company, Redblade is committed to providing a service that is predictable and dependable. We offer a range of services to the highest standards for all your IT related needs.

Successful implementation of Managed Service Solutions requires a few simple, tried and tested steps. At Redblade we have found the most important of all these is listening. We need to understand your business and gain insight into your long term business plan for future

Redblade offers the following services:

Network Services

- ◆ A standard Firewall Solution is essential in today's internet driven environment.
- ◆ Security Audits will bring to light any weaknesses not only from outside your network but also from within.
- ◆ Installation of remote VPN connections that allow your resources to remain in contact and well informed.
- ◆ Redblade are able to provide a fully integrated communications solution through implementing VoIP.
- ◆ From simple to advanced Switching and Routing Solutions are available.

IT Support Solutions

- ◆ Proactive Support encompasses the IT housekeeping essential to maintain an efficient running network and includes full support of your network.
- ◆ Bank of Days is a scheme where you can purchase a discounted advance number of days giving you Redblade's technical resources for whatever you may require.

Hosted Solutions

- ◆ Hosted Desktop Solution is a pay per user service whereby you enjoy the look and feel of a traditional network without having to own the equipment yourself.
- ◆ The Rack Space Service allows you to protect your business information by installing your own equipment in a secure, robust environment.
- ◆ Managed Hosting is a solution for when you would like us to manage your servers within a Data Centre.

Managed Services

- ◆ Redblade offer comprehensive project management and procurement services.
- ◆ Managed Network Monitoring ensures that incidents are responded to instantly through monitoring of applications and critical devices.
- ◆ Online Backup Service eradicates human error that is often the weakness of traditional backup tape solutions.
- ◆ Managed Firewall Solutions will give you peace of mind knowing that your network and your data are safe and secure.
